INCITEC

GREEN UREA NV® FERTILISER

SEE WHAT'S INSIDE

MORE EFFICIENCY. MORE FLEXIBILITY. MORE PRODUCTIVITY.

- Reduces nitrogen volatilisation losses by up to 82%, keeping more nitrogen available for your crop or pasture
- Apply up to 14 days ahead of rain, giving you greater flexibility around weather and application timing
- Improves nitrogen efficiency, helping your fertiliser work harder and protecting your investment
- Developed and tested in Australia for Australian soils, climate and farming conditions
- 12 month bulk storage life from bagging for greater flexibility and less pressure to use immediately

Want to get more from your nitrogen? Ask our staff about Green Urea NV® and whether it's right for your farm.

- Has strong activity on both grasses and broadleaf weeds

OUR PEOPLE

MEET THE FARMLAND CO TEAM

Local knowledge, practical experience and friendly service from the people who keep Farmland Co. moving.

KATE RAMM

MANAGING DIRECTOR

Kate started helping her dad, Steve, at Farmland Co. (formerly Farmers Warehouse) during school and university holidays after it opened in 2002. She officially joined the team in marketing in 2013, and in 2018 brought her MBA and leadership flair to champion knowledgeable teams and friendly, practical service. Away from work, she enjoys horses, travel and farm life with Scott, Frankie and Harvey.

RENEE

2IC + Sales – ANIMAL HEALTH AND EQUINE SPECIALIST

Renee grew up on a huge sheep farm down south, so agricultural know-how is in her blood. With agriculture and veterinary nursing qualifications, plus Thoroughbred and beef stud experience, she's Farmland Co.'s go-to problem-solver—and loves hunting down the right answer. In 2027, she marks ten years here. At home, Beau and young Jesse keep things lively.

MATT

SALES – FENCING SPECIALIST

Matt began his career with us in 2008 as an apprentice boilermaker at GT Steel, part of Farmers Warehouse, learning the trade while building cattle yards. Since then, he's gone from forklifts to becoming one of Farmland Co.'s top salespeople and fencing specialists. With a Certificate IV in Management, Matt knows his way around the business—and a fence. After hours, he's usually building more fences or fishing.

SAVANNAH

SALES – EQUINE SPECIALIST

Savannah joined Farmland Co. in 2023 and loves discussing equine and animal care with customers. Need help with NLIS or cattle tags? She's your person. She lives on her family's Dungog property with her Friesian horses. While dressage training and horse grooming keep her busy, she still makes time for the gym, camping and motorbike rides on weekends!

STEPHEN

CHEMICAL AND FERTILISER SPECIALIST

Stephen has been here since the doors opened in 2002, after beginning his career with Steve Ramm at Carr Bros in 1992. Known to everyone as ST, he is a Hunter Valley rural merchandise fixture. He tackles even tricky problems with a smile. Proud dad of three; convinced that a beach swim improves almost anything.

ALAN

ELECTRIC FENCING, WEIGHING AND EID SPECIALIST

Alan swapped the UK for Australian agriculture in 2018, beginning his career on a cattle station in Western Australia. After three years with Gallagher, he specialises in livestock handling, weighing, EID and electric fencing. He loves finding practical solutions on farms. Off the clock, Alan plays baseball and enjoys time with his wife Jess and Diesel, his dog.

COURTNEY

OFFICE MANAGER

If Farmland Co. were a well-oiled machine, Courtney would be the one who knows where every part belongs. She keeps the office and team on track with administrative skills, a keen eye for detail and a can-do attitude. She stays one step ahead before anyone notices a step was needed.

JESS

SALES – EQUINE SPECIALIST

Since 2019, Jess has brought Farmland Co. her equine expertise—and plenty of stories! Ask her about nutrition, worming, injuries or supplements. Raised on a dairy and beef farm, she's also a cattle-care pro, especially when it comes to vaccinating and drenching. These days, she competes in show jumping and shares home life with her two children, Billie and Colbie.

JEREMY

FORKLIFT OPERATOR

Jeremy has kept products moving safely since 2016, building agricultural knowledge along the way. He always enjoys helping customers and teammates and likes knowing his work helps local farmers and the community. One unexpected perk of the job? Meeting the four-legged visitors who drop into Farmland Co. with their humans.

DARREN

FORKLIFT OPERATOR

Darren has kept Farmland Co.'s day-to-day operations rolling since 2017, always ready to pitch in with enthusiasm. Born and bred in Telarah, he's local through and through. Away from the forklift, he enjoys a round of golf and a lawn so well kept it could probably win its own competition.

BRAD

DELIVERY DRIVER

Brad joined Farmland Co. in 2023 and always lends a hand, whether making deliveries, helping customers or keeping the store moving. His family's Gresford property is home to their Black Angus cattle. Off duty, he's happiest cooking a T-bone to perfection, watching some footy or planning his next fishing trip.

EVAN

SALES – DELIVERY DRIVER – FORKLIFT OPERATOR

Evan can often be found selling in-store, operating the forklift, or making deliveries—he wears many hats! Nearly three years into his time at Farmland Co., his entrepreneurial spirit and love of rural life are evident as he begins his journey into farm contracting. Downtime usually involves another project or outdoor adventures on the farm with his young daughter, Lola.

MARTIN

AGRONOMIST

Martin, our Farmland Co. agronomist since 2019, has decades of experience in farm management, agronomy, and breeding stud Dorper sheep. He turns soil science, pastures, fertiliser, cropping and weeds into practical advice. Honest and practical, he takes a whole-farm approach to improve productivity, sustainability and returns. His top tip? Always start with a soil test.

MORE THAN JUST A RURAL STORE

Practical advice, on-farm support and smart technology to help your operation work better.

ELECTRIC FENCING SUPPORT
Plan it right. Fix faults faster

From new fence design and product selection to system setup and fault finding, our team can help you build a safe, reliable electric fencing system suited to your property.

CUSTOM YARD DESIGN
A practical layout built around your operation

We can help plan cattle or sheep yards, compare layouts and equipment, and develop a tailored solution based on animal flow, safety, handling needs, site and budget.

WEIGHING, EID AND DATA SUPPORT
Get more from your livestock technology

We can help select, install and set up compatible Gallagher and Tru-Test weighing and EID equipment, then connect your livestock records with platforms such as AgriWebb. Start with a new system or get more value from the equipment you already own.

VACCINATION AND DRENCHING PROGRAMS
The right products at the right time

Our team can help with product selection and build a practical vaccination and drenching program tailored to your livestock, seasonal risks and management goals.

LEASE A GALLAGHER AUTO WEIGHER
See what is happening between yardings

Monitor regular EID-linked weight estimates and average daily gain while cattle visit the unit. Follow individual animals and mob performance, identify changes sooner and make better-informed feeding, drafting and sale decisions.

WHY LEASE AN AUTO WEIGHER?
Smarter monitoring with less handling

- Track individual and mob performance
- Monitor weight and growth over time
- Reduce frequent yarding and livestock stress
- View information remotely by web or mobile
- Choose cellular or satellite data access

WORM EGG COUNT TESTING
Know before you drench

A worm egg count measures parasite burden and is suitable for all livestock, helping you target treatment, reduce unnecessary drenching and check whether your parasite-management program is working for just $40.00 Inc GST per sample.

DELIVERY TO YOUR PROPERTY
Getting what you need, where you need it

Bulky order? Ask about delivery of fencing materials, livestock equipment and rural supplies directly to your farm or property.

BULK FEED SUPPLY
Buying feed regularly or in bulk? Let us quote

Give our team a call before your next order. Tell us what you use, how much you need and how often, and we will see whether we can offer better value, reliable supply and a solution tailored to your operation.

ON FARM AGRONOMY AND SOIL TESTING
Make every input count

Practical agronomy tailored to your land, livestock and production goals, including soil sampling and test interpretation, pasture selection and management, fertiliser programs, weed control, and advice to improve soil health and overall productivity.

BULK FERTILISER SUPPLY & SPREADING
From shed to paddock, we've got you covered

Bulk fertiliser supply and professional spreading to help get the most from your pastures and crops. We can help with product selection, application rates and reliable spreading to ensure your fertiliser goes where it's needed.

WEED ID AND SPRAYING RECOMMENDATIONS
Identify the problem. Choose the right approach

Our team can help identify common pasture, cropping or lawn weeds, compare suitable herbicide options and provide label-based spraying guidance tailored to the weed, crop or pasture and seasonal conditions.
